The Turkey fascist generals proclaim
war campaign against the kurdish people

The kurdish national liberation movement in Kurdistan fights side by side with the democratic forces of Iran and Iraq, Turkey and Syria against the reactionary forces in the Region and the U.S. Imperialism.

The Turkey generals, gendarmes of U.S. Imperialism, are turning since Sept. 1980 not only Kurdistan of Turkey but the whole Turkey in a huge Prison. They exercise terror inside and expansion outside the country.

Since 1937, the government of Turkey calls Kurds as mountain turkish. According to their view there exists no Kurds in Turkey, but in fact more than 13 million Kurds are living there and they fight since a long time for their human and national rights.

The government of Turkey and specially the Generals of Turkey are trying, using every means of suppression, to break down the will and resistance of kurdish people in Turkey as well as in other parts of Kurdistan. As examples Saad-Abad-Pact (between Turkey, Iran and Iraq) of 1937 and Bagdad-Pact (between Turkey, Iran, Iraq and Pakistan) of 1955 can be mentioned. Already in 1983, 1984, 1985 and 1986 they executed punishment expeditions against kurdish people in Turkey and also in Iraq. They began their latest heaviest punishment expedition in fourth of March this year. With 30 aeroplanes entered the turkish army the iraqian part of Kurdistan.

Specially detestable is the behaviour of Sadam government, who since 1983 has officially agreed with the government of Turkey on attacking the iraqian part of Kurdistan.

At the same time while carrying on the punishment expeditions in iraqian part, the Turkey generals used their helicopters and most modern tanks and arms with thousand of soldiers and rangers against the unguilty people in Kurdistan of Turkey.

On 8th of March this year, the government of Turkey called the syrian Ambassador to Foreign ministry and warned the syrian government that such a Punishment expeditions would be also executed in syrian territory.

The foreign minister of Turkey expressed his utmost hate towards syrian government and threatend, in a Fascist manner, imitating Gobbels, to walk inside Syria in order to liquidate the bases of Kurds coming from Turkey. As a matter of fact, there exist neither in Syria nor in Iraq the so called "bases belonging to Kurds coming from Turkey".

Masud Barzani, the president of Democrati Party of Kurdistan and officials from Syrian government clearly declared that such a bases do not exist. The policy of Turkey generals is directed against the growth and development of Kurdistan national liberation movement. The democratic movement in iraqian part of Kurdistan is stronger than ever before, specially through the efforts of patriotic democratic Front of Iraq, that unites arabs as well as kurds in fighting the Sadam-government.

The progressive antiimperialist policies of syrian government under Hafiz Assad is a thorn in the eyes of government of Turkey and also NATO. Assad supports the iraqian people as a whole, Arabs as well as Kurds, in their fight against the Sadam-regime and therefore attests also a certain sympathy for the kurdish people.

The government of Turkey tries with its punishment expedition in Iraq to renew the Mossul Problem of 1925. It wishes to occupy the kurdish regions, specially oil sources in Kerkuk (90 mill. t per year), in order to strengthen its economic and military power and to extend the NATO southern wing. Such a plans that are in agreement with Imperialism of America, are already

in the General drawers. That is no secret, about which man discusses publicly in the turkish parliament. The aim of punishment expeditions against Syria is to achieve something that the Israelis did not succeed to do, that means to defeat the Syrian progressive antiimperialist government.

The Turkey generals are threatening with their terror inside and aggression outside the country not only Peace in Kurdistan but also all the people in near east.

The kurdish and arab people in Iraq as well as the syrian government stand firm to fight the turkish attacks.

The attacks against syrian government and also against the iraqi part of Kurdistan would cost the Turkey generals a lot. Because the Syrian and kurdish people, supported by the great Soviet Union, would resist firmly.

The Turkey generals can never achieve what Israel did not succeed to do against syrian government and Iraqi government against the Kurds. Here the NATO plots are more clear to see than any where else. And the socialist countries, specially the Soviet Union, are aware of NATO capabilities and would abort them as they did in 1963.

The agressiv policy of Turkey facist generals is not rooted only in Ankara and Istanbul but takes roots directly in Pentagon. The present arm deliveries by Pentagon are aimed to be used against kurdish, syrian, greek, cyprian and other people. In this way the turkish generals should play their role as gendarms of american Imperialism in this region.

We appeal to all world public opinion: support the kurdish people in its just fight against the facist generals of Turkey who threaten severely the security and peace in this region.
