

SELF DETERMINATION FOR KURDISH PEOPLE

One more time the US Imperialism has shown its aggression against the peoples of the Middle East, such as it did in backing the Israeli aggression against Palestinian people and in backing the fascist junta of Turkey against the peoples of Turkey. Its puppet fascist Turkish Army intervened in Iraq in order to suppress the just liberation struggle of Kurdish people who live in that region.

Upon the request of the reactionary Saddami's regime, which is not capable of overcoming the Kurdish freedom fighters due to its war with Iran, the fascist junta of Turkey sent 7000- 8000 soldiers, On May 1983, Iraq in order to suppress the liberation movement of the Kurdish people who live in Iraq.

Before getting into Iraq, the fascist junta said that some "terrorists" escaped from Turkey to Iraq through the border and they were chasing these "terrorists" in Iraq, to justify its intervention. This was a lie. The Turkish troops were reported to go as far as 50- 60 miles inland. In the clashes between the fascist Turkish Army and the popular forces, there were heavy casualties on both sides. The junta forces destroyed some Kurdish villages and massacred the people.

This was also an attempt to organize the rapid deployment forces, which is in the process of being placed in the region by the US Imperialism. The function of these forces is to suppress the liberation movements.

This cowardly action of the US-backed junta of Turkey shows how the reactionary- fascist government can act together in the interest of imperialism in the region when necessary.

However, whatever the power of the enemy is, no force can stop the just liberation struggle of Kurdish, Turkish and other oppressed peoples of the Middle East.
